Please sign our petition – Stop Crude By Rail!

Please count me among the many citizens of Benicia and communities nearby who oppose bringing dangerous Bakken crude oil into Benicia by train. We have seen horrendous resulting explosions following the recent massive increase in transport of crude oil from Bakken shale fields in North Dakota and tar sands mines in Alberta. The California Attorney General and the National Transportation Safety Board have sent out alarms about this dangerous new method of transporting unconventional crudes. Not in Benicia! Not in the Bay Area! Not in communities uprail and downwind of Benicia!

Please convey my opposition to the City of Benicia and Valero.

PLEASE PRINT CLEARLY
